

I personally benefit from listening to XM radio and its weather and traffic stations. I feel that satellite radio is superior to broadcast radio and since purchasing my new 2004 vehicle equipped with XM Radio, I have not listened to broadcast radio.

XM Provides the quality and variety that I like and cannot find anywhere else.

I pay for this service and do not feel that the NAB has the right to limit what information I should be able to listen to.

I respectfully urge the FCC to reject the NAB's petition 04-160.

Thank You,

Terry Myers, Frederick, MD
